Finn, can you explore what, if any, the Leawood Stormwater Management Committee and/or the Sustainability Advisory Board can help our community with in managing stormwater runoff?

Their website is <https://www.leawood.org/public-works/stormwater.management/>

Thinking that Joel and our Landscaping Committee co-chairs (Pete Beyer & Laura Tedeschi) could work with the Sustainability Advisory Board.

Copied from their website:

- [Sustainability Advisory Board](#) — Promoting “green” options
- Curb Inlet Cleaning — Keeping storm drains clear of leaves and other debris
- Creek Cleanup — Maintaining and improving stream channels (Creek Cleanup Policy)
- Street Sweeping — Keeping debris out of storm drains

Thanks,  
Allison

If this weather is an example of the "new normal" I think we should definitely work with and learn from Leawood and their engineers/parks/stormwater management people.

All,

Mike and I are still out of town — unfortunately we've learned of building 25 flooding during this week's downpours.

I never go on Next-door — except this morning. Happened to see this message with a thread response from Lisa Harrison (Leawood City council Member). She's advised a Leawood Estates homeowner to contact the Leawood Stormwater Management Committee to review their neighborhood storm drains which overflowed and flooded property. Time to do so for Tomahawk Creek Condominiums?
